ABOUT ME

I am a fourth-year computer science student passionate about bridging the gap between technology and creativity. Alongside my love for programming, I find joy in exploring the fields of design and graphics, where I can mix logic with visual expression. Whether I am creating elegant user interfaces or experimenting with digital art, I am constantly looking for ways to innovate and push the boundaries. Beyond the screen, music is my muse, fuelling my creativity and inspiring me to think outside the box. With a diverse skill set and a drive for innovation, I am excited to chart my own path at the intersection of technology and creativity.
